Backend developer (node js), I have developed a lot of web application with RESTful APIs and integration with database, I also have a lot of skills in front-end design and development, And I developed front-end web application with API integration.

OUTSTANDING PROJECTS

Saraha App

Saraha clone. Through it, the user can make a registration via his email or through his Facebook account, and a link to verify Saraha account will be sent to users email, and this is done by using (nodemailer module), and then the user can login to his Saraha account, and then he will be able to send his Saraha link to other Saraha users to write messages to him and he can see all these messages on his account, and from the features in the app also is the ability for the user to change his profile photo and I used (multer) to do this and I stored the users profile photo by using (cloudinary).

EDUCATION

College: Student in **Higher Institute of Engineering and Technology in Bihira**.

SKILLS & OTHER

Skills: Node js, Express, MongoDB, mongoose, HTML, CSS, JavaScript, MySQL, Sequelize.
